# MongooZe

MongooZe is a communication Mobile Application designed to conduct virtual meetings. It provides reliable video telephony and chat services required for a successful virtual meeting. This has many useful features needed to conduct online classes in a school or a university and for business meetings.

Mongooze offers features that let you turn facetime into a collaboration time by adding more participants to the video conference, share youtube videos, and live chat.
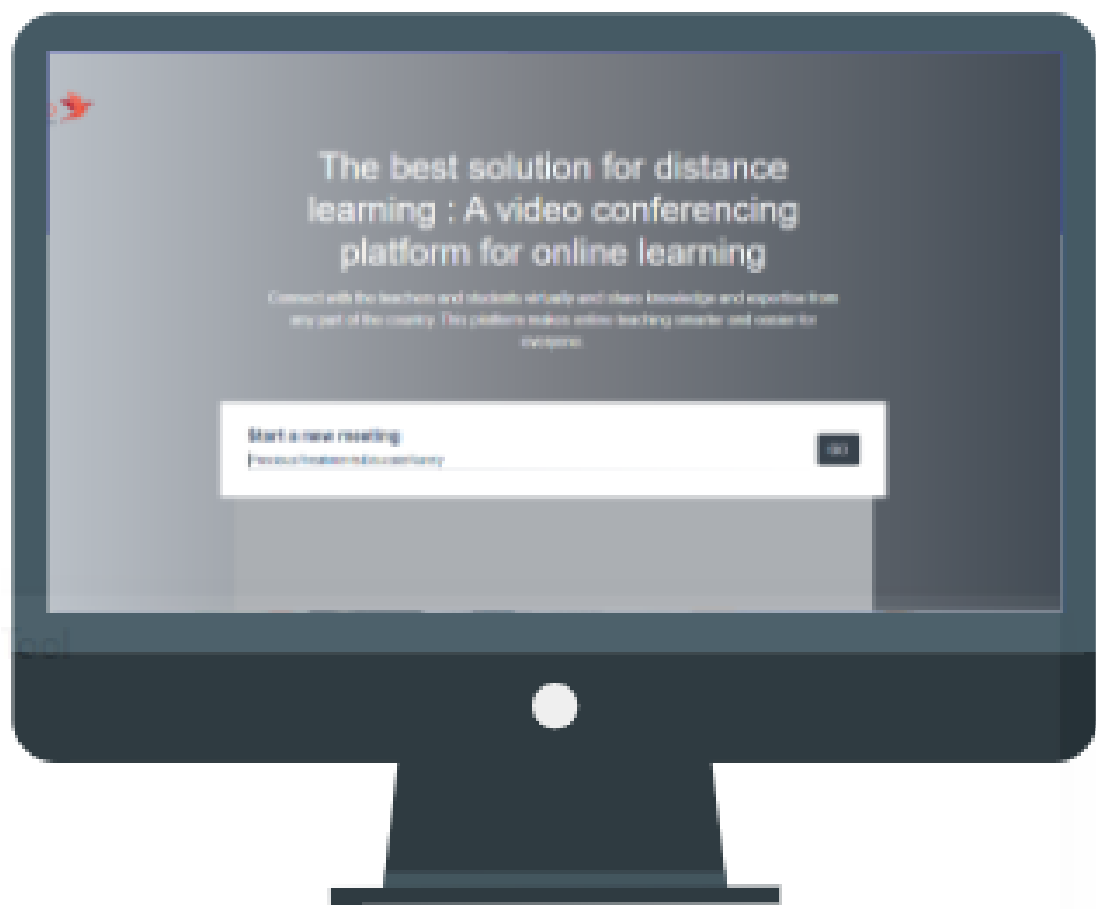

Key Features

- Connect - Initiate and join the meeting room easily.

- Collaboration - You can invite more participants to the meeting.

- Security - Enhance security by adding a password to the meeting.

- Live Chat - Chat and trade emojis with all the participants or a specific participant during the meetings.

- Raise hand - wanna draw attention from the host or wanna speak up during the meeting? Use the raise your hand option and others will be notified.

- Video quality - Adjust the video quality according to your needs and enable the Audio only option during the meetings.

- Share a YouTube Video - Play a YouTube video with all the meeting participants.
